Eligibility Requirements:	If issues arise or when the situation is an immediate crisis and cannot wait or you have no access to a telephone, go directly to the Emergency Department at Jameson North Campus, 1211 Wilmington Avenue, New Castle, PA, where a psychiatric assessment will be completed and appropriate treatment recommendations will be provided. Jameson ED is staffed with highly skilled psychiatric assessment staff that is specifically trained to assess individuals in crisis. For individuals who may not be willing to come voluntarily to the Emergency Room for an assessment and are in imminent risk of harm to themselves or others, a mental health delegate should be called for assistance. The delegate can be reached 24 hours a day/7 days a week at phone number (724) 652-9000.
Population Served:	Mental Health/Behavioral Health Services offers a continuum of care for mental health treatment and strives to provide comprehensive, safe and competent care to enhance the quality of life for individuals and their families. Our multidisciplinary team of health care professionals includes doctors, physician assistants, nurses, social workers, counselors, activity therapists and mental health technicians who support patients and their families with individualized, coordinated care services tailored to meet the special needs of adults and older adults. ER assessment and disposition planning for child/adolescent population only, there is no adolescent inpatient program available at this time.

<p>Statement of Services:</p>	<p>Recovery oriented mental health treatment approach in a therapeutic environment geared toward empowering people to recover, succeed in accomplishing their goals, and reconnect to themselves, others, and the meaning and purpose in life. The intention of Behavioral Health Services is to provide high quality individualized care in a non-biased program regardless of race, religion, sex, ethnicity, age, or disability.</p>
<p>Mission Statement:</p>	<p>In all that we do, to all whom we serve, we promise caring and compassion, dignity, and respect, responsiveness, and courtesy, and we strive for excellence, consistent with the values on which the Hospital was founded. The primary purpose of the treatment program is to provide empowerment and self-directed, recovery oriented care for adult/geriatric mentally ill consumers in the least restrictive setting.</p> <p>Because we believe that each person is unique, all treatment plans are individually designed with your input to meet specific needs. The focus of treatment is practical and solution focused with an emphasis on symptom reduction and learning healthy coping skills. Families and support persons are a valuable resource and are encouraged to participate in treatment goals.</p>
<p>Brief Overview of Services/Programs:</p>	<p>INPATIENT SERVICES</p> <p>The inpatient program features two (2) distinct and separate units, a 12 bed geriatric unit and 16 bed general adult unit, all within a modern, peaceful and comfortable setting. These programs offer:</p> <ul style="list-style-type: none"> • Personalized Treatment Planning • Intensive Mental Health Care and 24 Hour Medical Supervision • Individual Process and Psycho Educational Groups • A thorough psychiatric and medical assessment of each individual by a team of psychiatrists, nurse practitioners, physician assistants, psychiatric nurses, social workers, psychologists and other staff to accurately develop a specialized treatment plan. • Intensive individual and group therapies and family education • Education on psychiatric disorders and current treatment options. • Medication evaluation and management • Coordination with outpatient behavioral health services to provide ongoing care and treatment upon discharge to the most appropriate level of care. • Address psychiatric crisis in a hospital setting <p>PARTIAL HOSPITALIZATION PROGRAM</p> <p>The Partial Hospitalization Program provides acute, short-term treatment Monday through Friday, 8:00AM-4:30PM with a capacity for 15 adults. Partial Hospitalization provides a vital alternative for those who do not require inpatient treatment, need intensive follow-up after inpatient stay or lack enough support at home to be successful as an outpatient.</p> <p>Treatment Approach: By breaking down the restrictive treatment categories of "inpatient" and "outpatient", partial hospitalization provides an appropriate degree of care</p>

while allowing the client the ability to continue being a functioning member in the community during their recovery.

Therapeutic Benefit:

- Provides a day program treatment intervention designed to further stabilize acute symptoms of mental illness and facilitates recovery.
- Creates a supportive environment fostered by professional staff dedicated to maintaining and enhancing the independent functioning of each client.
- Group therapies designed to improve coping skills, increase ability to manage psychiatric symptoms, improve understanding of mental and emotional illness and increase knowledge of psychiatric medications.
